

A Versatile On Desk Power Module

The USB 2.0 Hub allows you to connect up to four USB devices to a computer through a single USB connection. It supports fast data transfer speeds of up to 480 Mbps and is suitable for use with a wide range of USB devices.

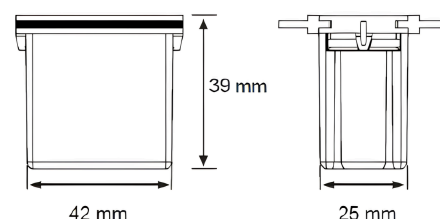

The hub is plug and play, so no additional drivers are required. It also supports hot swapping, allowing compatible devices to be connected or disconnected without restarting the computer. Built-in over-current protection helps protect both the connected devices and the hub.

Key Features

- Four USB 2.0 ports
- Data transfer speeds of up to 480 Mbps
- Plug-and-play operation
- Compatible with USB 2.0 and USB 1.1 devices
- Built-in over-current protection
- No additional drivers required
- Compatible with Windows and Mac operating systems, as well as Linux
- Supports simultaneous connection of up to four USB devices
- Dimensions: 49 x 44 x 32.5 (mm)
- Weight: 30g

Supplied:

- USB 2.0 Hub
- 1.5m USB connection cable
- 2 x brushes
- User manual

USB Hub Connection

Connect the supplied USB cable to an available USB port on your computer, then connect the other end to the hub.

USB Device Connection

Connect your USB devices to any of the four available ports on the hub. When removing a device, stop any active data transfer and safely eject the device from your computer before disconnecting it.

Care and Use

Keep the hub away from impacts, direct sunlight, high temperatures and damp or humid environments. Damage caused by incorrect use or exposure to extreme conditions is not covered.
