In June of 2007, the European Union adopted a regulation called REACH (**R**egistration, **E**valuation, **A**uthorisation, and **R**estriction of **C**hemicals). The regulation covers all substances and materials either manufactured or imported into the European Union, and articles that intentionally release substances.

Our parts are articles that do not contain SVHC's and do not intentionally release any substances. Banbury Plastic Fittings Ltd has neither applicable substances, nor preparations, nor articles that intentionally release substances to warrant registration, pre-registration, or assigning Own Representatives.

We do have responsibilities under REACH; namely, communication regarding SVHC's (**S**ubstances of **V**ery **H**igh **C**oncern) must be accomplished within a very short window according to the regulation. Therefore we have ensured that the responsibility and authority for checking the SVHC lists is established and maintained for each of our critical suppliers, and that the vehicle for communication exists between our companies.

We full intend to comply with Annex XVII of the REACH Directive. We will comply with notification requirements if substances contained in our articles become listed, whether on the published Candidate List or the Annex XVII. We also will comply with requests within the 45-day requirement. Banbury Plastic Fittings Ltd is dedicated to satisfying our customers and protecting our environment.

If you have any questions, please contact me.

Thank you very much for your interest in our products.
