

Our Transformable range have been designed specifically to help make the most out of any room spaces. We have a collection of pull out, fold down and sliding frames which allow users to create tables and extra worktops that can be folded away and hidden from site when not in use. The patented design integrates all of the parts (mechanism and tops) within the surrounding unit, maintaining a clean, tidy look.

- All available as standalone frames as standard allowing use of own tops. Some frames are available with a pre-loaded white laminate top
- All the frames are load rated, between 20kg and 100kg (evenly distributed), depending on frame.
- Wide choice of sizes available to suit a number of standard drawer widths and table depths.

WORKTOP / SHELF EXTENSIONS
