1.0 HOW THE X SERIES WORKS

With its patented, modular design the X series of desk can be built into almost any shape or sized desk – serving a multitude of applications including standard desks / workstations, back-to-back bench desks, meeting room / board room tables etc. All the styles of leg; X2, X3, XD2 and X20 use the same blades and connecting beams, allowing unlimited versatility.

1.1 WHICH BEAMS TO USE

The X series beams are available in incremental sizes ranging from 234mm long all the way up to 1834mm long that can be used to create any frame length required – The table below shows traditional desk & required beams:

BEAM	RECCOMENDED FRAME	MIN	MAX
834mm	1000mm	934mm	1304mm
1034mm	1200mm	1134mm	1504mm
1234mm	1400mm	1334mm	1704mm
1434mm	1600mm	1534mm	1904mm
1634mm	1800mm	1734mm	2204mm
1834mm	2000mm	1934mm	2304mm

Due to the patented connection system each beam length can be used to create a desk frame any length up to 470mm longer than the beam size for example a 1634mm beam can be used to make a frame ranging from 1734mm all the way up to 2204mm.

2.0 X2 DESK CONFIGURATIONS & OPTIONS

X2 is our range of cantilever desks which are Italian designed and use a patented frame system. The entry level desk in our range; X2 is perfect for the home or workplace, and with X2 you have choice of a straight cantilever office desk or with the option of a return extension to create an L shaped desk. X2 is available in 2 frame finishes as standard, White or Silver, and complimented with your choice of top. As with all of our X range of desks we have many optional extras available including Desktop privacy screens, Modesty Panels and Cable Management Solutions. For more details on these please contact sales.

- KEY FEATURES -

- Modular Design - same beam / blade system as X3, XD2 & X20.
- Easy to assemble – comes with all required fixings and tools.
- Simple to adapt configurations into standard rectangular desks, long runs for multi personnel or L shaped desks, with a return.

2.1 CONFIGURATIONS

STANDARD RECTANGULAR DESK

The traditional option with X2 is to use 1 pair of legs with one connecting beam to form a rectangular Cantilever Desk for 1 operator.

L SHAPED DESK, WITH RETURN

Using an extra leg, additional beam and a beam hooker to connect them all, X2 can easily have a return added to a frame to create an L shaped desk:

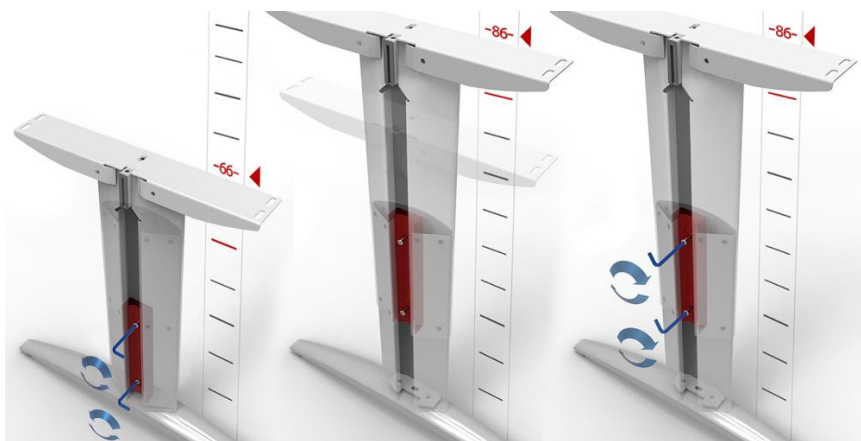

MULTI-PERSON BENCH DESKS

The modular design means the same legs, beams and blades used to easily create long linear runs of desk. The beam and blade system is simply daisy-chained through the legs to create any length required.

HEIGHT-ADJUSTABLE DESKS

We also have a manual height adjustable version of the X2 legs allowing for a 200mm height adjustment. These can be used with the same standard connecting beams, adding extra versatility to the X2 desk options.

X2 CANTILEVER DESKS

2.2 OPTIONS

FRAMES

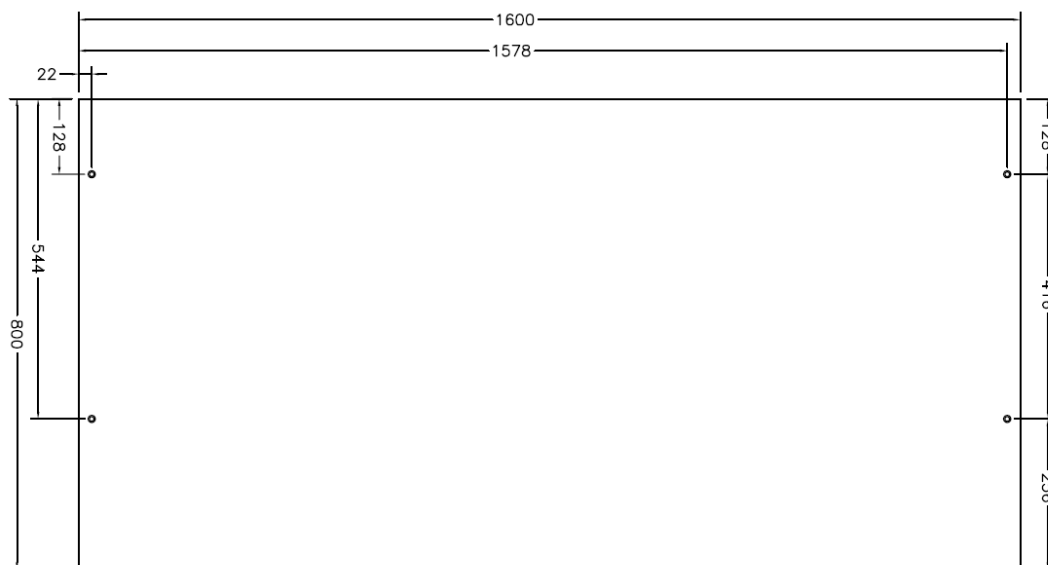

The X2 frames are available in two standard finishes; Silver / Alu (Ral 9006) and White Matt (Ral 9003).

In addition to standard options we can get other finishes on request – Including: White Gloss (Ral 9010) and Anthracite Gloss (Ral 7016).

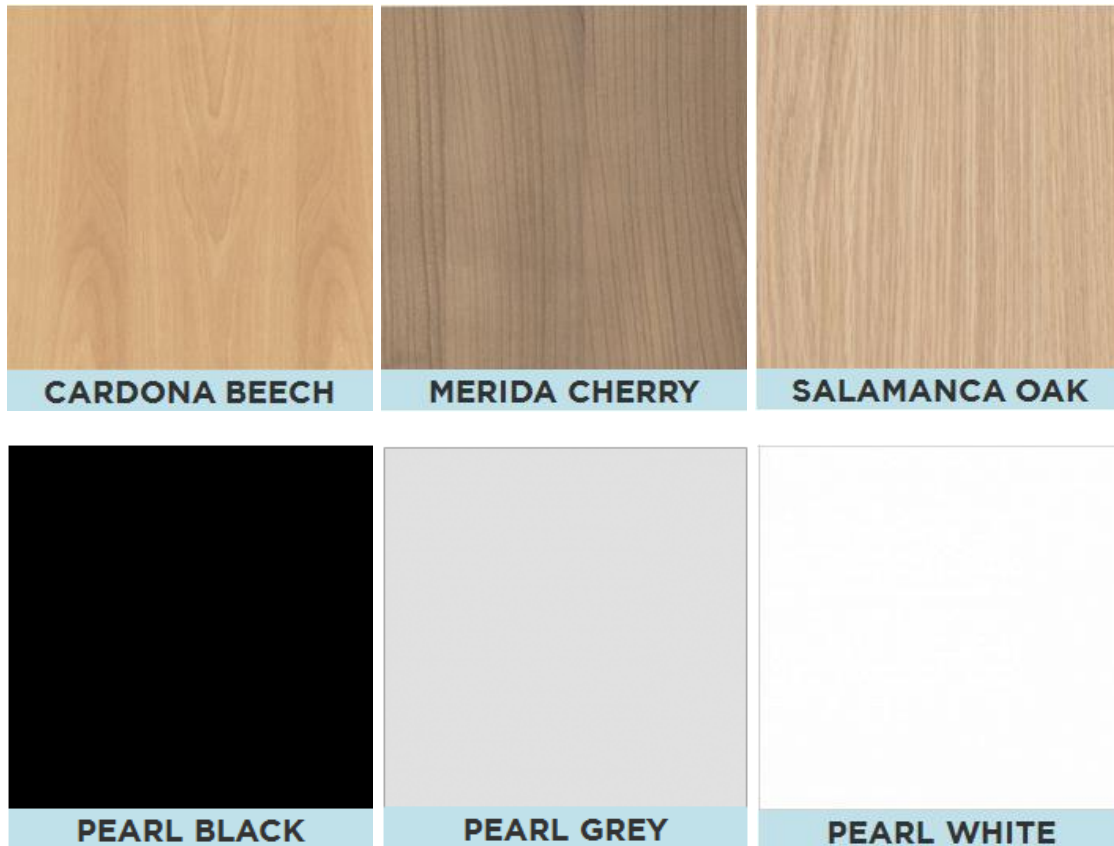

TOP TEMPLATE

The top template for X2 desk (available as a high res PDF on request)

DESK TOP OPTIONS

We have 6 standard desk top finishes. Available in either 18 or 25mm thick MFC (Melamine Faced Chipboard) with 2mm thick ABS (Acrylnitril Butadien Styrol) edging and 2mm radius all round.

SPECIAL & PREMIUM DESK TOPS

Whilst this is our standard stock range we can supply other colours & finishes on request. In addition we can also supply other shaped tops including Square, Round and Oval, even asymmetrical ones can be made-to-order, with options for thicknesses and different edging styles; for example chamfered edging. We can also predrill cable management holes in to the tops to suit any shape / style required.

If MFC isn't suitable for your requirement we also offer alternative desktops on request including MDF, Glass, Corian and Solid Oak etc. For more information on which other top finishes are available please contact Darryl@box15.co.uk.

2.3 SCREENS & ACCESSORIES

Our X Series universal screens use a clamp fixation system to attach to any desk making them perfect additions to any X2 desk.

The X Series screens are available with either silver or white frames (to match the desk frames) and with a choice of fabric or PMMA panels. The fabric panels are available in the following standard colours:

- Ivory Panel
- Red Panel
- Yellow Panel
- Green Panel
- Blue Panel

And the PMMA Panels are Opal White as standard. Other fabric panel colours are available upon request.

The X series of screens all double up as a tool bar so you can add compatible monitor arms or stationary trays to the screens.
